

Online order tracking solution

**ICETRAC** is a fully integrated communication system that enables all parties an open window, to access information relating to each shipment.

Benefits of ICETRAC

- ✓ Gives you transparency which gives you certainty
- ✓ Eliminate time-consuming processes of data input
- ✓ Send your orders to ICE as soon as the order is placed
- ✓ Communicate through a spam and spyware-free environment
- ✓ Specify when and who should be providing the information and which messages should be received

**ICETRAC** lets you see when your goods are picked up, progress whilst in transit, when they are scheduled to arrive and confirmation that they have arrived. A colour coordinated timeline makes it very easy to view the status of the orders.

You can view this information 24/7 through our secure website, or we can e-mail you a cumulative order status report in an interval you specify (daily, twice weekly or monthly). The report can be customised to your specification.
